Find The Perfect Fit
By Using Our Online
Find Your Case Tool

The screenshot shows a web interface for finding a case. At the top, it says '+ FIND YOUR CASE'. Below this are two dropdown menus: 'Choose Your Manufacturer' and 'Choose Your Product'. A link 'Can't find your product?' is next to a 'GO!' button. Under 'Search by Dimensions', there are radio buttons for 'Inches' (selected) and 'Millimeters', and input fields for 'Length:', 'Width:', and 'Height:'. A diagram of a case with dimensions L, W, and H is shown. A 'GO!' button is at the bottom right.

GATOROLOGY - <noun>

A system of methods and principles for quality.

G-FLEX

Rigid padding used in Gator's Gig Bags offering extreme instrument protection.

LIGHTWEIGHT CONSTRUCTION

This method of construction is a blend between dense foam and nylon. The interiors are constructed with a dense EPS foam that is shaped to create a "hard" case. Then we cover the foam with high quality 600 denier nylon to make it appear similar to a bag yet have the rigidity of a hard case.

DENIER NYLON

A strong nylon material that is used in the construction of bags. The higher the number, such as 600-denier, the better the quality. 600-denier is highly tear-and-water-resistant.

PE- HIGH DENSITY POLYETHYLENE

PE is a rugged plastic material which has a high resistance to impact. PE provides good performance in low temperatures where other plastics would crack and is highly resistant to both chemicals and moisture. Gator uses PE for the products that need to take the hardest beating on the road.

EPS FOAM - EXPANDED POLYSTYRENE

EPS is a thermal plastic material. It is formed to make a dense foam that is ideal for creating form fit protection for the product. Gator uses EPS to create case interiors and structures.

G-TOUR

G TOUR™ is a Gator designed flight cases with heavy-duty aluminum extrusions and rugged laminated plywood exterior.

ABS- ACRYLONITRILE BUTADINE STYRENE

ABS plastic has good impact resistance and impact absorption. It is easily formed to make all shapes and sizes. Gator uses ABS for the cases that are designed to offer strong hard case protection but do not need the extreme durability of PE.

EVA ETHYLENE-VINYL ACETATE

EVA is a polymer used to absorb physical shock. Gator uses EVA to give extra protection between foam and nylon along with forming tough contoured molded pieces.

ROTO-MOLD

The rotational molding process is a high temperature, low pressure plastic forming process that uses heat and biaxial rotation (i.e. rotation on two axis) to produce hollow, one piece parts. Gator utilizes roto-molding for large format products that require form fitting capabilities.

LIGHTWEIGHT AMP HEAD CASE

- Ballistic nylon exterior over wood frame
- 20mm interior foam covered in Tricot
- Storage pocket for pedal controllers and channel switching pedals
- Web side carry handles
- Tow-handle & wheels

Rugged tow-handle

Model	Weight	Interior Dimensions
G-901	27.6 lbs	30"x12.5"x10.5"

LIGHTWEIGHT AMP CASES

- Reinforced hard top for supporting amplifier on stage
- Rails to prevent amp from vibrating off the stand during performance
- Rugged nylon material over 1/2" wood frame
- Interior is 20mm foam covered in Tricot
- Tow-handle & wheels
- External accessory pocket

Model	Weight	Interior Dimensions
G-112A	26.5 lbs	25"x19.5"x12"
G-212A	39.7 lbs	30"x24"x12"

G-TOUR SPEAKER CABINET CASES

- Adjustable flight case fits most 4x12 size guitar speaker cabinets like the Marshall 1960 series
- 3/8 inch plywood construction
- Ultra-Dur EVA interior padding
- Front lid "stay in case" design with hinged rear access allows cabinet to be used while in the case
- Rear cable port
- Heavy-duty hardware and 4 casters

Model	Interior Dimensions
G-TOUR CAB412	30.5" x 30.5" x 15"

G-TOUR AMP CASES

- Tour case for combo amps
- G-TOUR AMP112 is an adjustable fit case for most 1x12 size guitar amps
- G-TOUR AMP212 is an adjustable fit case for most 2x12 size guitar amps
- 3/8 inch plywood construction
- Heavy-duty interlocking interior padding
- Heavy-duty hardware
- "Lift off lid" design allows the amp to remain in base during use
- 4 casters

Model	Interior Dimensions
G-TOUR AMP112	25.6" x 22.2" x 13.1"
G-TOUR AMP212	30" x 23.75" x 14.1"

G-TOUR AMP HEAD CASES

- Tour case for amp head
- Fits most popular guitar amplifier heads like the Marshall JCM series
- "Lift off Lid" design allows amp head to remain in base during use
- Ultra-Dur EVA interior padding
- 3/8 inch plywood construction
- Heavy Duty Hardware

Model	Interior Dimensions
G-TOUR HEAD	30.31" x 10.28" x 12.48"

G-TOUR MINI HEAD CASE

NEW
SERIES!

- Fabricated plywood construction
- EVA Dur interior protection
- Heavy Duty Gator Signature Hardware
- Small GTOUR case for "mini" guitar head amplifiers - 13 x 7 x 7.5
- Medium GTOUR case for "mini" guitar head amplifiers 7.5 x10 x10
- Large GTOUR case for "mini" guitar head amplifiers 20 x 12 x 12

EVOLUTION SNARE DRUM CASE SERIES

- Featuring a newly patented drum rim suspension system
- The case contacts **ONLY** the rim of the drum, providing industry leading protection
- Molded-in suspension platforms with foam rubber pads center the drum and suspend it, by contacting the rim at only eight points. This floats the drum inside the case and creates air-space around the drum shell, hardware, and heads
- The drum is centered, secured, and suspended inside the case. Any impact and vibration the case may be subjected to is minimally transferred to the drum
- No pressure on the heads or shells means better tuning stability
- The case closes securely using 2" wide polypropylene web strap and YKK side-release buckle. Rated at 350lbs tensile strength
- The case is made from tough, weatherproof, yet lightweight rotationally molded polyethylene plastic. This super tough material stands up to years of abuse, but is always easy on your back
- The octagonal shape creates extra room inside case to accommodate suspension mounts, hardware, and strainer throw-offs. Another benefit of this unique shape is that it features flat outer faces which provide a stable base for resting the case. No more rolling around
- Extra side crush protection; the top edge of the bottom shell is captured in the lid to prevent side impact from reaching the drum
- Outer case shell design includes ribs for added strength and secure stacking. All sizes stack together and share a common back-edge

MARCHING SERIES

Logging as many touring miles as any musical equipment, marching percussion drums, carriers and accessories must be durable enough to withstand the rigors of cross continental travel. Protechtor Cases are backed by a limited lifetime warranty and available for all marching percussion equipment.

Elite Marching Snare Case

The Elite Marching Snare Case incorporates the Elite Air Series design to provide ultimate protection without the need for foam. Fold out handles and oversized wheels come standard.

GP-PC219	Large Marching Snare Case

Model	Description
Bass Drum Cases	Bass Drum Cases Available for 16" to 32" Bass Drums

Rugged strap and heavy-duty buckles keep everything in place

CLASSIC SERIES

Recognized as the industry standard rotationally molded drum cases, Protechtor Cases' Classic Series provides strength, durability and simplicity for almost any drum size. The rotational molding process gives added strength and durability to case corners and provides water resistance that non-roto molded cases can't match. Custom depths and colors are available. All Protechtor Cases come with a limited, lifetime warranty against cracking.

The Multi-Tom case features rounded pockets to make room for floor tom leg mounts. The 34" maximum depth allows for any combination of floor toms (up to 16" diameter), mounted toms and/or snares.

Model	Case Diameters Available
TOM CASE	8" - 10" - 12" - 13" - 14" - 15" - 16" - 18"

GATOR frameworks

our**brand**

Gator Frameworks was developed by musicians and audiophiles that are passionate about their gear. Every stand must meet the scrutiny of the product designers that “yes, this is the one I would choose to buy and use on stage, at work or in my home”.

From the get go we wanted to do something new, something that looked sleek and that worked better than anything out there in the market today. From this ideology was born what we call our iD series, which is truly a new stand line from the ground up and is our iD in the market. This series incorporates clean lines that allow them to easily be stored and look elegant when in use. All the mechanisms were diligently thought through and tested to insure they not only looked great but they worked in a way that was natural and easy to use.

At the core of all Gator Frameworks product design is the mission for it to be easy to operate and to hold up to extensive use. The handles, knobs and mechanisms are designed to operate in the most instinctive way and to feel comfortable in your hand. Our goal is to humanize every product. We utilize only the best of materials and have added attributes from the inside out such as thicker extrusion and anodized parts to every product to insure that they will sustain the rigors of the field.

In the end our mission is to create products that you do not have to worry about. Products that do their job so that you can focus on what you are passionate about: your music.

We support your music... literally.

iD Series Features

The iD Series from Gator Frameworks offers the ultimate in innovation, style, ergonomics, and durability. The features in this series have been tirelessly researched and refined during the various development stages. The result is the finest stand products to date. Functionality, ease of use, and a light weight set these products apart and truly create the Gator Frameworks iD.

Adjustable Tripod

- Cable Management
- Lightweight
- Patent Pending

Signature Series Features

We thought of it... so you didn't have to.

The focus of Gator Frameworks is to ensure that every point that you operate your stand feels comfortable in your hand and functions smoothly. Every latch, clutch, knob and lever has been researched and designed around your hand to protect it and to make it smooth to operate. Functionally every stand is designed to operate as simply and natural as possible. Fine details like matte finished surfaces are a deliberate step to make the stand less intrusive on its environment whether at home or on the stage.

When you feel a Gator Frameworks stand you will know the difference... our designs are truly musician and human centered.

RACK DRAWERS

Gator Cases offers a large selection of rack drawers designed for any of your rack needs. All Gator rack drawers feature fully enclosed 16 gauge cold roll steel construction. The heavy-duty smooth-glide drawer slides and spring-loaded latches make using these drawers effortless. The rack drawers are coated with a classic black powder finish for a clean, uniform look. For added security, drawers include a lock knock-out and a complimentary lock and key (not available on shallow rack models).

Wireless Drawer Features:

- 3U size drawer with wireless microphone nests
- Nest stores 4 wireless microphones, body packs, headsets and accessories
- Wireless storage accommodates microphones with clip still attached
- Body pack and microphone storage area lined with Polyethylene foam and Tricot covered plywood dividers

Wired Microphone Drawer Features:

- 2U Rack drawer stores 10 hard wired microphones
- Each microphone cavity is 6.5" x 2" x 2"

RACK & KEYBOARD SHELVES

- Cold rolled 16 gauge steel construction
- Black powder-coated finish

Keyboard Drawer Features:

- Separate compartments for keyboard and mouse
- Rear access for cables
- Fits most standard small pattern keyboards

Keyboard Shelf Features:

- Sliding shelf for keyboard with mouse shelf
- Fits most standard keyboards

Standard Shelf Features:

- Rear flange for rigidity

Vented Shelf Features:

- Elongated vent holes for optimum air circulation
- GE-SHLF-SLD-1U is a sliding vented 1U shelf

Trap Shelf Features:

- Clamping trap shelf with padded clamping bars
- 2U clamp range is 1.8" - 2.5"
- 3U clamp range is 2" - 4.3"
- 25 lbs weight capacity

Universal Shelf Features:

- Universal hole pattern for mounting smaller rack components

Keyboard Drawer features a built-in cable management system with retractable arm

Keyboard Shelf has a dual staggered shelf design

Adjustable padded clamping bars

Universal hole pattern for mounting smaller components

Vent holes allow optimum air circulation

POLYETHYLENE MOLDED SHOCK RACKS

Gator's lightweight Polyethylene shock racks are built for protection and function. The shock rack is specifically designed to allow 360 degree air ventilation around equipment to keep your gear lasting longer. Adjustable interior sliding support on each side of rack adjusts front to back and up and down for rear support of gear to eliminate shifting and jostling. Recessed side handles give your hands a break while the locking lid gives you peace of mind.
